

XSW-1

Stereo Reference headphones

The DSL XSW-1W delivers a sonic experience far beyond the realms of reality. They feature intricate studio-grade driver units for a full bodied sound output and higher sound resolution. The earmuff is designed to isolate the user from unwanted environment sound and enhance the listening experience. The XSW-1 is styled to executive perfection with utmost subtlety and charisma. The charcoal black closed covers are outlined with silver steel and are finished with pewter grey soft-velvet ear muffs & a harbour grey leather finish headrest.
